UniFi® U-PRO-MP

QUICK START GUIDE

Hardware Installation

The UniFi AP can be mounted on a wall, ceiling tile, drop ceiling T-rail (up to 40 mm), or electrical junction box. Perform the steps for the appropriate installation.

> **Note for UniFi AP replacement:** The holes marked "A" on the *Mounting Plate* line up with the holes of mounting brackets used for previous UniFi AP models.
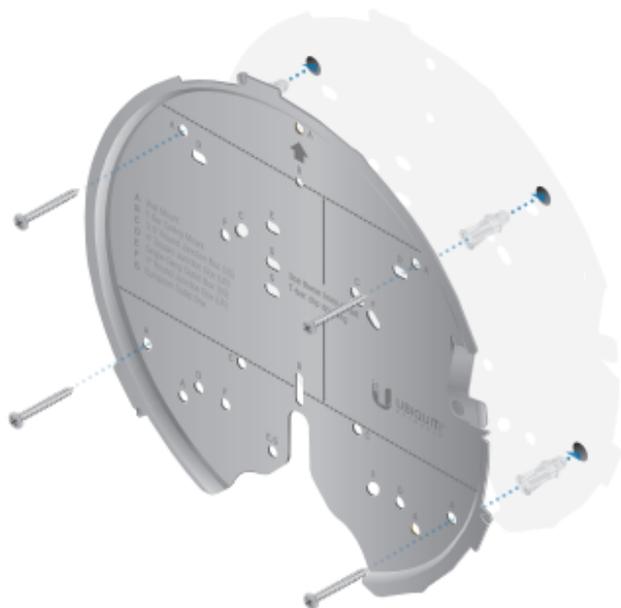

Wall Mount

1. Position the *Mounting Plate* at the desired location on the wall with the *Arrow* pointing up.
2. Mark the four mounting holes labeled "A", and use an 8 mm drill bit to drill the holes. If your Ethernet cable feeds through the wall, cut or drill a hole approximately 18 mm in diameter. Then feed the CAT5/6 cable through the hole.

*Optional 18 mm Hole for Ethernet Cable Feed through the Wall*

640-00279-06

3. Insert the *Screw Anchors* into the holes. Secure the *Mounting Plate* to the wall by inserting the *Wall Screws* into the anchors.

4. Go to the *Connecting Ethernet* section, and then return to step 5.
5. Align the *Arrow* on the top edge of the UniFi AP with the *Arrow* on the *Mounting Plate*.
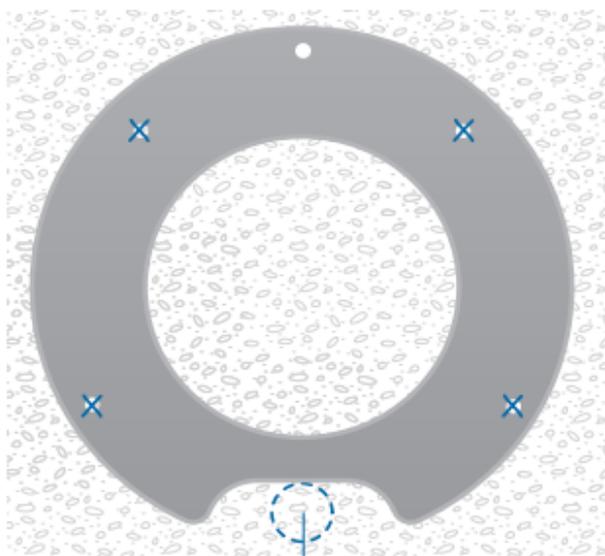

6. Rotate the UniFi AP clockwise until the tabs lock into place and the *Lock Tab* engages.
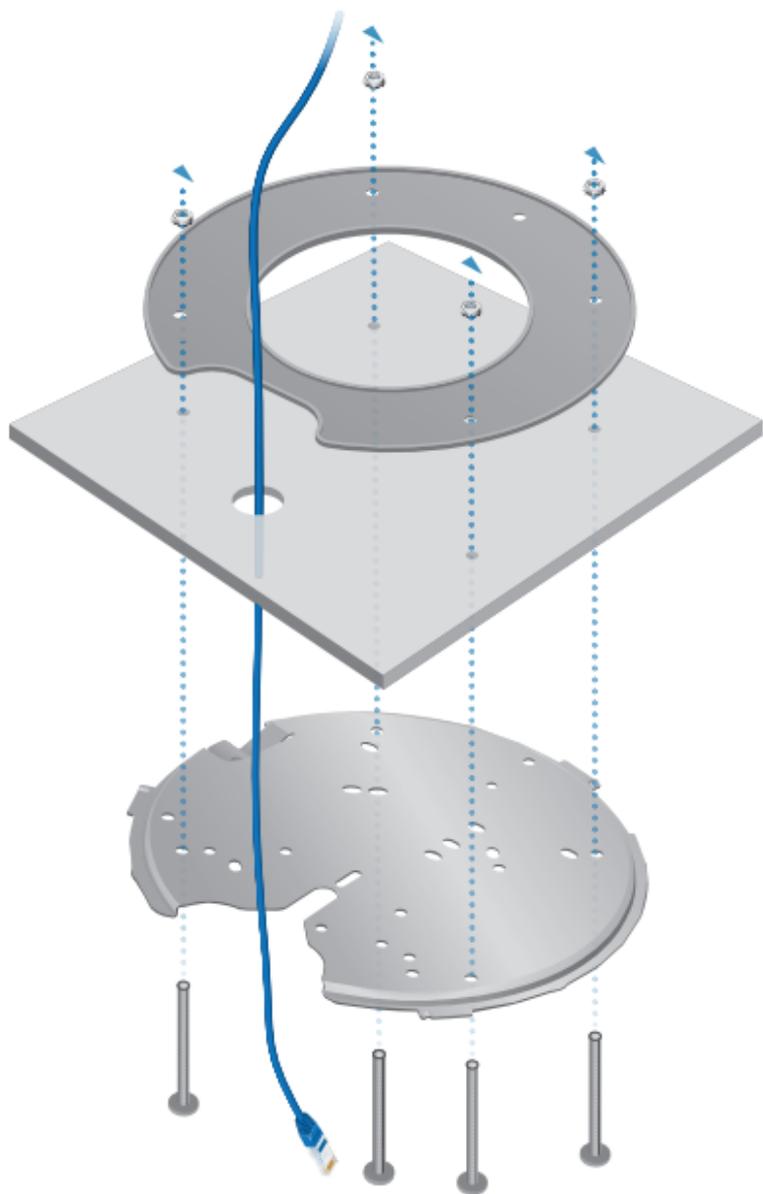

Ceiling Mount

1. Remove the ceiling tile.
2. Place the *Ceiling Backing Plate* in the center of the ceiling tile. Mark the four mounting screw holes and an 18 mm hole for the Ethernet cable feed.
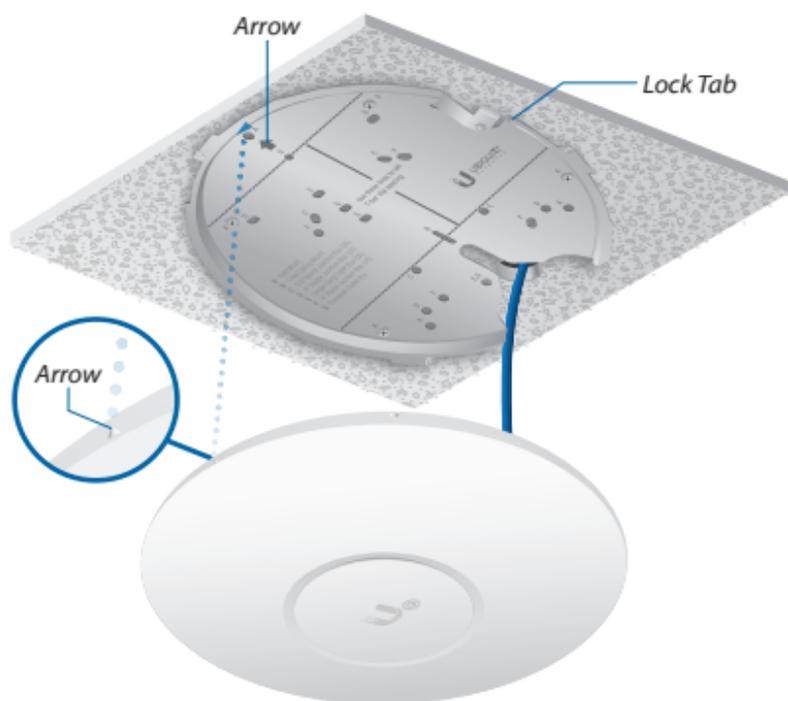

*Optional 18 mm Hole for Ethernet Cable
Feed through the Ceiling Tile*

3. Use a 3 mm drill bit to drill the screw holes, and cut or drill the 18 mm hole for the Ethernet cable feed.

4. Insert the *Ceiling Screws* through the *Mounting Plate*, ceiling tile, and *Ceiling Backing Plate*. Fasten the screws using the *Keps Nuts*. Then feed the Ethernet cable through the tile and bracket.

5. Perform the steps in the *Connecting Ethernet* section, and then return to step 6.

6. Align the *Arrow* on the top edge of the UniFi AP with the *Arrow* on the *Mounting Plate*.

Lock Tab

Arrow

7. Rotate the UniFi AP clockwise until the tabs lock into place and the *Lock Tab* engages.

8. Set the ceiling tile back into place.

T-Bar Mount

1. Remove the ceiling tiles on both sides of the T-bar you will use for mounting.

2. Loosen the set screws of the *T-Bar Mounts*.

3. Insert the T-bar into a *T-Bar Mount*, and turn the *T-Bar Mount* clockwise to attach it. Use the included *Allen Wrench* to tighten the two set screws to secure the *T-Bar Mount*.

4. Attach the second *T-Bar Mount* but do not tighten the set screws.
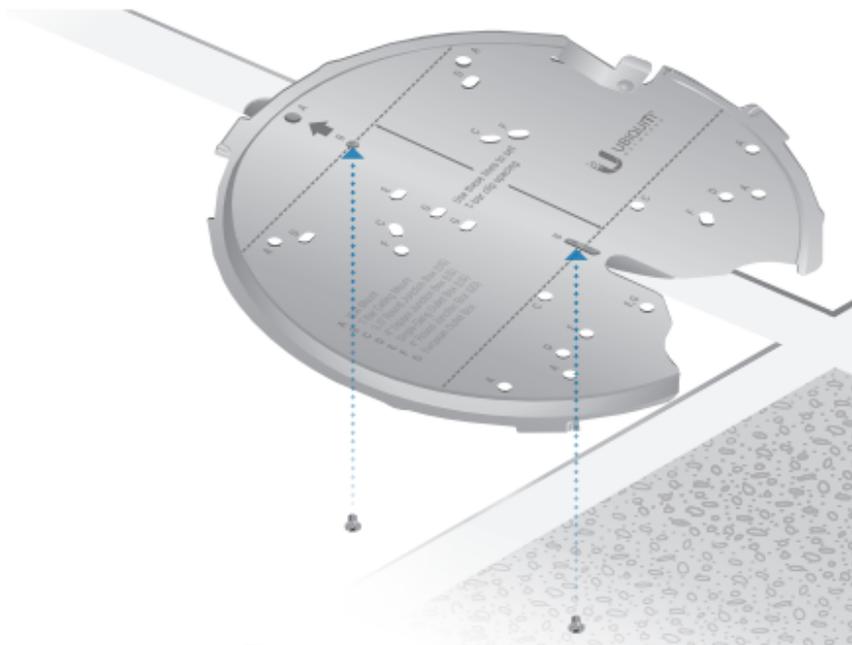

5. Use the two dashed lines on the *Mounting Plate* to space the *T-Bar Mounts* 77 mm (3") apart.

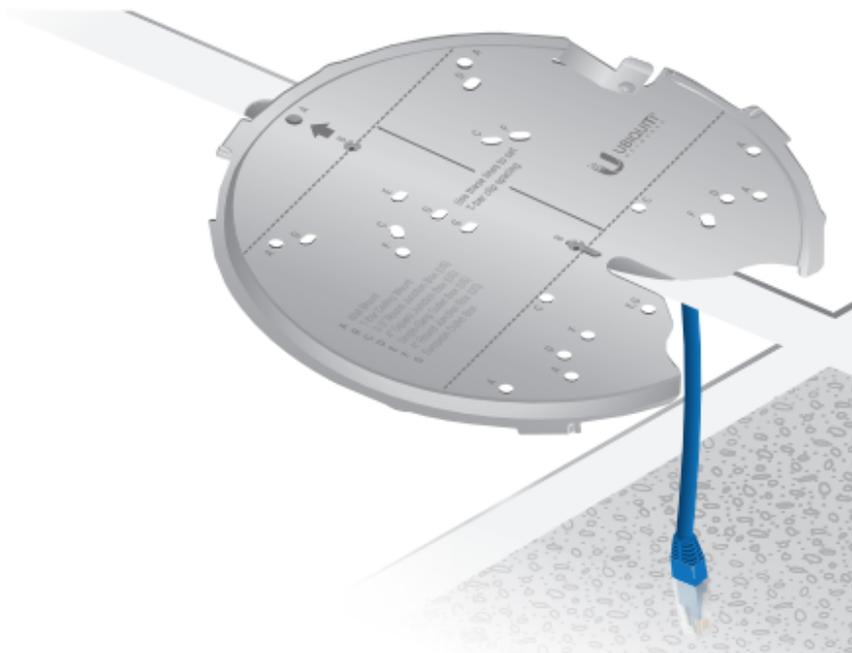

6. Tighten the two set screws on the second *T-Bar Mount*.

7. Insert the included *T-Bar Screws* into the holes marked "B" on the *Mounting Plate,* and then secure the plate to the *T-Bar Mounts*.

8. Drop the Ethernet cable between the plate and T-bar.

9. Perform the steps in the *Connecting Ethernet* section, and then return to step 10.

10. Align the *Arrow* on the top edge of the UniFi AP with the *Arrow* on the *Mounting Plate*.

11. Rotate the UniFi AP clockwise until the tabs lock into place and the *Lock Tab* engages.

12. Set the ceiling tiles back into place.

Junction or Outlet Box Mount

1. Use the legend printed on the *Mounting Plate* to select the appropriate mounting holes for your installation.

2. Pull the Ethernet cable through the *Mounting Plate*, and attach the *Mounting Plate* to the junction or outlet box using at least two screws (not included).
   > Note: For in-wall applications, position the *Mounting Plate* with the *Arrow* pointing upwards.

3. Perform the steps in the *Connecting Ethernet* section, and then return to step 4.

4. Align the *Arrow* on the top edge of the UniFi AP with the *Arrow* on the *Mounting Plate*.

5. Rotate the UniFi AP clockwise until the tabs lock into place and the *Lock Tab* engages.
